

Cameras, Speed Control, Signage

September 1, 2019

MICO is proud to announce that after two and a half years we finally have permission and have placed cameras to help protect our neighborhood.

Add to that, Neighborhood Watch signs will be placed along our street. We are looking for volunteers to help install them and more volunteers to help manage and operate the program.

MICO has requested that the canes be cut back at the second curve. Last year the parish cut canes nearby and the residents have been gracious to keep the area cut. The parish takes a while to respond so if anyone in the neighborhood can give a hand, that would be appreciated very much.

The condition of the street and the numbers in most need were resubmitted for repair once again. Everything requested takes time. Patience truly is a virtue.

The speed indicator machine is scheduled to be erected very soon (so I am told).

I am sorry to announce that the parish will no longer provide or create signs for our waterways. You will have to order those yourselves. We are ordering signs to alert the commercial fishermen. There will be no commercial fishing, shrimping, or crabbing in Moonraker Canals or Moonraker Lake.

One other sign will be ordered, "NO SOLICITING on Moonraker Dr."

Hope Arriaza, head of a committee on covenants, is hard at work. We will hear from the committee soon.

Thanks to John Mathews who took over keeping the triangle cut and trimmed. He is doing a great job.

Bonnie
